

The Mercy Circle of Caring[®]

It's never been easier to save your own life.

Cardiovascular disease is the number one cause of death for both men and women in the United States. Coronary artery calcifications are associated with a higher risk of heart attack. New generation CT Scanners can accurately detect coronary calcification. That's why Mercy Hospital Anderson, the leader in cardiovascular care for the east side,^{*} offers Cardiac CT scanning for your personal calcium score — to detect heart disease before you may have obvious symptoms. It's convenient, noninvasive, and an effective way to determine if you are at risk for coronary artery disease. And it's only \$99 at Mercy Hospital Anderson. Early warnings, another part of the Mercy Circle of Caring.

With an order from your doctor, call 95-MERCY to schedule your Cardiac CT scan today. Find out your calcium score and find out if you're at risk.

Bring this ad when you come for your scan to enter a drawing^{**} to receive a FREE one-hour massage from Mercy HealthPlex Anderson.
