

### Patient comfort and privacy

St. Elizabeth Boardman and these surgical suites are designed around you, the patient. Because your comfort has a direct impact on how quickly you will recover, we've taken every opportunity to make sure you are as comfortable as possible during your stay with us. Each patient room, including where you will prepare for surgery and where you will recover is private.

We've found that patients heal faster when they have the support and presence of their loved ones. In addition to private patient rooms, we offer open visiting hours, which means that your family can be with you as much as you like.

### St. Elizabeth Boardman Health Center

As part of the Humility of Mary Health Partners network, St. Elizabeth Boardman provides an additional means for residents of the Mahoning Valley to receive quality care close to home. In addition, nearby St. Elizabeth Health Center offers the area's only Level 1 trauma center, the highest level of care available.

**Surgical Services**

*The design of St. Elizabeth Boardman Health Center builds on the clinical strength and mission-based history of St. Elizabeth and St. Joseph Health Centers. The surgical suites that make up the hospital are no exception.*

### **State-of-the-Art Surgical Suites**

With more than 32,750 square feet and capacity for six operating rooms, everything from the floor to the ceiling reflects the latest technology:

- Fully-integrated rooms to allow laparoscopic video, radiology and vascular images to be viewed on any of the room monitors at the touch of a computer screen.
- Each surgical suite incorporates boom technology, which clears the operating room floor by suspending all medical equipment from the ceiling.
- Specialized flooring implanted with an anti-bacterial agent allows for advanced infection control throughout the surgical area.

- Polymer lighting fixtures rotate, pitch and roll 360-degrees and are designed to provide a maximum intensity natural light source while reducing glare and eyestrain.
- Each room is equipped with satellite radio to provide relaxing background music for the surgeon and staff, if desired.

Our surgical services include, but are not limited to, the following:

- **Vascular**
- **Ears, nose and throat**
- **Flexible endoscopy**
- **General**
- **Gynecological**
- **Laparoscopic**
- **Maxillofacial**
- **Ophthalmology**
- **Orthopedics**
- **Plastic/reconstructive**
- **Podiatry**
- **Retinal**
- **Urologic**
- **Various forms of laser surgery**
